Other (please indicate benefit to the right of columns)				

* Calculate the portion of increased income per year. For example, one of your program participant's obtained a raise of \$2 per hour, she is a full time employee. You will calculate \$2 x 2,080 hours= \$4,160 per year raise. This is the number you will add in the quarter in which you collected the data since we are using non-duplicated numbers, you can only report the income increase for this specific participant once in the year.

**This refers to the participant's children and adolescents.

Legislative and Policy Change Measures	Quarter 1	Quarter 2	Quarter 3	Quarter 4
